I. INTRODUCTION

Background

The eastbound US Route 24 Bridge (Quincy Memorial Bridge) is in Adams County, Illinois and Marion County, Missouri. The Quincy Memorial Bridge spans the Mississippi River in Quincy and is a major connector between Missouri and Illinois. It serves the business/residential district in Quincy, Illinois. The east approach to the bridge is in downtown Quincy and ties directly in to the City's main city streets. The primary scope of the planning study is to evaluate alternatives for the improvement of the existing bridge. The alternatives may range from rehabilitating or reconstructing the existing bridge, to replacing it with a new bridge on its current alignment or a new alignment.

The anticipated limits of the project may extend approximately one mile or more east and west of the Mississippi River for the improvements to the existing Quincy Memorial Bridge structure and approaches. Major stakeholders for this project will be the Illinois Department of Transportation (IDOT), Missouri Department of Transportation (MoDOT), US Army Corps of Engineers, US Coast Guard and the City of Quincy.

Impact on business, residential communities, and traffic will be taken into account during the planning stage of this project. Stakeholders are encouraged to participate at stakeholder's meetings to share their ideas and to make comments on the project. It is anticipated that this project will require an Environmental Assessment (EA) and has been identified as a Context Sensitive Solutions (CSS) project. CSS is a collaborative, interdisciplinary approach that involves all stakeholders to develop effective multi-modal transportation solutions that fit into the project's surroundings and preserve the scenic, aesthetic, historic, and environmental resources while maintaining safety and mobility. Travelers, communities, businesses, elected officials, public agencies, emergency service providers, and many others are all "stakeholders" in our transportation system.

Public participation is an essential part of the Phase I Location Study and Environmental Assessment for this project. This Stakeholder Involvement Plan (SIP) has been developed to outline a public involvement process that conforms to IDOT's guidelines for CSS and FHWA's National Environmental Policy Act (NEPA). The SIP is a framework plan that is both comprehensive and flexible based on the project needs, and thus subject to revision as the project development warrants.

II. REGULATORY ENVIRONMENT

State and Federal Requirements:

The Quincy Memorial Bridge improvement study is being conducted in keeping with State and Federal requirements meant to integrate environmental values and public interaction into transportation improvements. The requirements include those of NEPA and IDOT's CSS policy and procedure.

National Environment Policy Act (NEPA)

This study will be governed by NEPA and state regulatory requirements. NEPA is one of the federal laws that outlines policies to protect the environment. It establishes policy, sets goals, and provides a means for carrying out policy. The NEPA process requires federal agencies to integrate environmental values into their decision making processes by considering the impacts of their

proposed actions to the natural and human environment and reasonable alternatives to these actions. NEPA encourages coordination with the public and resource agencies throughout the project development process.

It is anticipated that this project will require an Environmental Assessment (EA). An EA is defined as a concise public document that serves to:

- Briefly provide sufficient evidence and analysis for determining whether to prepare an Environmental Impact Statement (EIS) or a Finding of No Significant Impact (FONSI), and
- Facilitate preparation of an EIS when one is necessary.

The following excerpt from the IDOT Bureau of Design and Environment (BDE) Manual further defines an EA:

The FHWA regulation in 23 CFR 771.119 states that an EA will be prepared for each action that is not a Categorical Exclusion (CE) and that does not clearly require preparation of an EIS, or where FHWA believes an EA would assist in determining the need for an EIS. It is important to remember that the decision to prepare an EA is project-specific and should be based on a number of factors including, but not limited to, the context and intensity of anticipated environmental impacts and the level of public interest in the project. IDOT and FHWA will jointly determine those projects for which an EA will be prepared.

Agencies should integrate the NEPA process with other planning activities early in the project to ensure that planning and decisions reflect environmental values, in order to avoid delays later in the study and to identify potential conflicts as early as possible. FHWA and IDOT act as joint lead agencies for most IDOT NEPA projects and are responsible for identifying and inviting cooperating agencies to participate in the NEPA process. NEPA merger meetings are required to provide participating agencies opportunity for input at key junctures during the course of the study.

Agency Involvement

An agency involvement process will be used during the study to actively involve federal and state environmental, regulatory, and resource agencies in the study. Informal meetings are anticipated between IDOT and these agencies to provide information about the studies and solicit environmental input. In addition, all agencies with jurisdiction or permitting authority will be provided with project updates and invited to scheduled public informational meetings and the public hearing. Informal telephone, email, and mail communication will also take place as necessary over the course of the study.

Context Sensitive Solutions

Given the potential for impact on Quincy at the east approach of the structure, IDOT Central Office, along with the IDOT Region Four Deputy Director of Highways - Roger Driskell designated this project to be developed using the principals of CSS per the IDOT CSS Policy and Procedural Memorandum 48-06. The current project constitutes a fresh look at transportation issues and community concerns through an open and comprehensive planning process. Stakeholder issues and objectives identified through the CSS process will need to be acknowledged and appropriately considered as part of the project effort. A Stakeholder is someone who could be affected by the project or has a "stake" in the success or failure of the project. Travelers, communities, residents, businesses, elected officials, public agencies, emergency service providers, and many others are all "stakeholders" in our transportation system.

“CSS is an interdisciplinary approach that seeks effective, multi-modal transportation solutions by working with stakeholders to develop, build, and maintain cost-effective transportation facilities that fit into and reflect the project’s surroundings - its “context.” Through early, frequent and meaningful communication with stakeholders, and a flexible and creative approach to design, the resulting projects should improve safety and mobility for the traveling public, while seeking to preserve and enhance the scenic, economic, historic, and natural qualities of the settings through which they pass.”

The CSS approach will provide stakeholders with the tools and information they require to effectively participate in the study process including providing an understanding of the CSS process, transportation planning guidelines, design guidelines, and the relationship between transportation issues (needs) and project alternatives. In other words, using the CSS process should provide all project stakeholders a mechanism to share comments or concerns about transportation objectives and project alternatives, as well as improve the ability of the project team to understand and address concerns raised. This integrated approach to problem solving and decision-making will help build community consensus and promote involvement throughout the study process.

As identified in IDOT’s CSS policies, stakeholder involvement is critical to project success. The CSS process strives to achieve the following:

- Understand stakeholder’s key issues and concerns.
- Involve stakeholders in decision-making process early and often.
- Establish an understanding of the stakeholder’s project role.
- Address all modes of transportation.
- Set a project schedule.
- Apply flexibility in design to address stakeholder’s concerns whenever possible.

A clear and concise Stakeholder Involvement Plan (SIP) is critical to the success of CSS principals on a project. The SIP is a framework plan that is both comprehensive and flexible based on the project needs, and thus subject to revision as the project development warrants. The project life is comprised of three distinct phases. Phase I, the current project phase, includes the preliminary design and environmental studies, Phase II includes detailed plan preparation and land acquisition, and Phase III is the actual implementation including construction of the project.

III. STAKEHOLDER INVOLVEMENT GOALS AND OBJECTIVES

The primary goal of the study is to develop a transportation solution that is:

- 1) Technically sound.
- 2) Economically feasible.
- 3) Satisfies the intent of the CSS policy.
- 4) Understood by a majority of those affected by it.

Achieving this goal requires careful integration of stakeholder and technical input in a way that uses time and resources efficiently and produces results that address the communities’ transportation needs. With this in mind, the stakeholder involvement process is specifically intended to:

- Provide the necessary background for informed input and involvement.
- Integrate input from community members, special interest groups, governmental agencies, and technical support groups.
- Develop in conjunction with IDOT, evaluation criteria that addresses the community, agency, and technical concerns to assess the proposed alternatives.
- Use professional process planning and facilitation to ensure all public interaction is productive, useful, and duly considered.

At a minimum, the public involvement process is intended to allow interested persons the opportunity to participate in the study, if they wish to do so, and to have their viewpoints sought and seriously considered with a process that is complete, inclusive, and transparent.

IV. PROJECT STUDY GROUP

In keeping with IDOT's CSS policy and procedures, a Project Study Group (PSG) has been formed for this project. The PSG is the multi-disciplinary team organized to develop this project. The PSG has primary oversight responsibility for the overall project development process to ensure that all applicable Federal, State, and Local requirements are being met, and to ensure full implementation of the SIP. The primary objectives of the PSG include the following:

- Maintaining and expediting the project development process.
- Identification of the project development issues.
- Providing guidance for developing solutions to identified issues.
- Promoting collaborative partnerships with all involved parties to address identified project needs.

The disciplines and expertise within the PSG will depend on the context and stages of the project. The membership of the PSG is not static, but can and will evolve as the understanding of the project context develops and project requirements change. Although the membership may change, the leadership of the Group remains constant, with the IDOT District Project Engineer serving as the group leader throughout the study. From the initial scoping of the project and its apparent context components, the following persons are assigned to the PSG:

PROJECT STUDY GROUP			
NAME	POSITION	ADDRESS	PHONE/EMAIL
Roger Driskell	Deputy Director of Highways - Region Four Engineer	IDOT District 6 126 East Ash Street Springfield, IL 62704	(217) 342-8201
Jeff Myers	Acting Program Development Engineer	IDOT District 6 126 East Ash Street Springfield, IL 62704	(217) 782-7331
Laura Mlacnik	Land Acquisition Engineer	IDOT District 6 126 East Ash Street Springfield, IL 62704	(217) 782-7301
Sal Madonia	Acting Studies and Plans Engineer	IDOT District 6 126 East Ash Street Springfield, IL 62704	(217) 782-4760

Keith Donovan	Acting Studies and Plans Project Engineer	IDOT District 6 126 East Ash Street Springfield, IL 62704	(217) 782-4761
Tom Cox	Studies and Plans Team Manager	IDOT District 6 126 East Ash Street Springfield, IL 62704	(217) 557-6349
Dan Mlacnik	Geometrics Engineer	IDOT District 6 126 East Ash Street Springfield, IL 62704	(217) 785-5333
Wes Clark	Acting Programming Engineer	IDOT District 6 126 East Ash Street Springfield, IL 62704	(217) 782-7332
Dennis Johnson	Hydraulics Engineer	IDOT District 6 126 East Ash Street Springfield, IL 62704	(217) 785-5322
Dennis O'Connell	Environmental Coordinator	IDOT District 6 126 East Ash Street Springfield, IL 62704	(217) 785-9727
John Negangard	Acting Operations Engineer	IDOT District 6 126 East Ash Street Springfield, IL 62704	(217) 782-7314
Brandon Dudley	Operations Bridge Engineer	IDOT District 6 126 East Ash Street Springfield, IL 62704	(217) 785-9290
Susan Graham	Local Roads & Streets Engineer	IDOT District 6 126 East Ash Street Springfield, IL 62704	(217) 782-4690
Ron Archambeau	Acting Project Implementation & Construction Engineer	IDOT District 6 126 East Ash Street Springfield, IL 62704	(217) 782-7401
Scott Stitt	IDOT BDE Project Development Chief	IDOT Central Office 2300 S Dirksen Pkwy Springfield, IL 62764	(217) 785-0721
Lou Haasis	Transportation Engineer, IDOT District 6 & 7	FHWA 3250 Executive Park Drive Springfield, IL 62703	(217) 492-4282
Janis Piland	Environmental Engineer	FHWA 3250 Executive Park Drive Springfield, IL 62703	(217) 492-4989
Christopher Knapp	Transportation Project Manager	MoDOT PO Box 1067 Hannibal, MO 63401	(573) 248-2586
Stan Hansen	Project Manager	Crawford, Murphy & Tilly 2750 W. Washington St Springfield, IL 62702	(217) 787-8050 shansen@cmtengr.com

Kristin Timmons	Project Engineer	Crawford, Murphy & Tilly 2750 West Washington St Springfield, IL 62702	(217) 787-8050 ktimmons@cmtengr.com
Rich Kerhlikar	Lead Structural Engineer	Crawford, Murphy & Tilly 2750 West Washington St Springfield, IL 62702	(217) 787-8050 rkerhlikar@cmtengr.com
Mary Lamie	CSS/Public Involvement	EFK Moen, LLC 303 Fountains Parkway Suite 240 Fairview Heights, IL 62208	(618) 206-4250 mlamie@efkmoen.com
Shelley Dintelman	CSS/Public Involvement	EFK Moen, LLC 303 Fountains Parkway Suite 240 Fairview Heights, IL 62208	(618) 206-4250 sdintelman@efkmoen.com
Chris Linneman	Structural Engineer	EFK Moen, LLC 303 Fountains Parkway Suite 240 Fairview Heights, IL 62208	(618) 206-4250 cdlinneman@efkmoen.com

V. STAKEHOLDER IDENTIFICATION

Stakeholder involvement is critical to the success of this project. The SIP strives to achieve the following with respect to the development of this project:

- Involve stakeholders in decision making early and often throughout the project development process.
- Address stakeholders' key issues and concerns.
- Address various modes of transportation through the project corridor.
- Involve appropriate disciplines for planning and design.
- Apply flexibility in design to address stakeholders' concerns.
- Incorporate aesthetics as part of good design, and as feasible within the project's budget.

The PSG developed a list of project stakeholders based on IDOT's list of local and regional elected officials, local and regional agency representatives, community organizations, and property owners. Additionally, the PSG will contact the chamber of commerce and the regional planning commission in Quincy along with local businesses and utilize the internet to identify additional representatives of local businesses, industries, schools, and other organizations. The Project Stakeholders List will be updated throughout the project development process as additional interested parties are identified. The current list of the project stakeholders is provided in Appendix A.

VI. STAKEHOLDER INVOLVEMENT

Since there are many stakeholders and interested groups that may be affected or otherwise have a stake in the project, several different opportunities will be provided to ensure that each is included in the decision making process.

Public Meetings – Public Meetings will be held to inform and allow collaboration. These will include two public involvement meetings and a formal public hearing.

The initial public informational meeting is intended to 1) introduce the proposed project study area to the public, 2) gather information from the public about the context of the study area, and 3) request Community Advisory Group (CAG) members. Information will be provided about the background of the project, along with details of the study process. The meeting will be held in an open house format with a minimum two-hour duration.

A second public informational meeting will be held to present information and receive feedback about the alternative improvement design concepts that are identified and analyzed over the course of the study. Two or three alternatives for further study will be shown and public comment will be requested. Additional alternatives may be identified that may be more feasible. The format will be similar to that of the initial public informational meeting, with flexibility allowed for the use of various multi media as seen fit to convey the project information.

A public hearing will be held near the conclusion of the study. Its purpose will be to 1) present the recommended alternative to the public, along with the information that was used to support its selection as the preferred plan, and 2) document public statements about the preferred plan. The hearing will be conducted in an open house format for informal review of the study materials and discussion with IDOT PSG members and the study's CAG members.

Small Group Meetings – Briefings with individual businesses or groups of businesses, schools, park districts, churches, and homeowners associations over the course of the study will be used, if needed, as an opportunity to introduce the project, provide project updates, and receive specific input on the project from the group.

Project Website – A link is provided on the IDOT website for posting of documents, exhibits, and data provided at the various public forums. The direct link to these postings is www.quincymemorialbridge.com. This website is intended to provide up-to-date information about all aspects of the study and includes study documents and exhibits for viewing and downloading.

Media Relations – Local newspapers, radio stations, and television stations may be contacted for disseminating information about the project. Notices and reminders of project meetings will be sent out to area media outlets in advance of the public meetings and following significant study events or milestones.

Comment Forms – Comment forms will be provided at public meetings to encourage participants to provide their comments on the project. Comments may also be submitted through the project website www.quincymemorialbridge.com. Comments may be provided in writing or electronically. Comments will be accepted at any time during the study process. All comments will be reviewed and incorporated as appropriate.

Community Advisory Group (CAG) – A key element of this Stakeholder Involvement Plan will be the creation of a CAG. The CAG will assist the Project Study Group in identifying community context and determining community characteristics that should be taken into consideration during the planning process.

This group is expected to consist of representatives from a broad cross-section of area and regional interests (i.e., community stakeholders). In order to be effective, the number of members on the CAG should be sufficient to ensure all potential social, economic, and environmental project issues, from both a local and regional perspective, are considered and evaluated throughout the project development process. The CAG must also be manageable in size and structure to ensure meetings are effective and productive to permit project progress. In that regard, the CAG may be limited to one or two representatives from similar entities/interests in order to ensure broad representation within a functional group size.

Community Advisory Group Objectives – The main role of the CAG is to build consensus and incorporate community values and considerations into the Department's decision making framework. The CAG will achieve several study objectives as defined in the CSS process. The CAG meetings will be moderated by IDOT's consultant and have specific project topics for discussion on which an informed consensus can be made.

Example meeting topics to include:

1. Community Context Audit (CCA)
2. Problem Identification with the existing transportation facility
3. Project vision
4. Evaluation criteria for defining project alternatives
5. Potential Alternatives
6. CAG's Preferred Alternatives

Detailed engineering and technical information will be presented by IDOT and its representatives to the CAG throughout the study as information is developed. In this way, the CAG will function as a community liaison or pipeline between IDOT and the public. The CAG meeting format is not intended as a public forum or workshop; however the meetings will be open for the public to observe and opportunities will be provided to ask questions. Several public stakeholder meetings and other opportunities for public comment will be held throughout the project. It is important to note that consensus will be sought on each issue discussed. *Consensus* is defined as "when a majority of the stakeholders agree on a particular issue, while the remainder of stakeholders agree their input has been heard and duly considered and that the process as a whole was fair". IDOT is committed to working with all agencies and stakeholders in the study process to identify issues early and seek consensus on disagreements. IDOT is therefore committed to building CAG consensus for project decisions. However, if an impasse has been reached after making good-faith efforts to address unresolved concerns, IDOT, as the ultimate decision-making authority for the project, may proceed to the next stage of project development without achieving consensus. In the case of an unresolved dispute, the PSG, through IDOT, will notify the CAG of their decision and proposed course of action.

Community Advisory Group Participation and Responsibilities – The various CAG meeting participants will include PSG representatives and the CAG membership. The general public is welcome at all CAG meetings, but is expected to remain in the role of observers, not participants in the process.

The responsibility of the *Project Study Group's representatives* include: 1) participating in two-way communication with CAG members, accepting the responsibility to receive and consider stakeholder concerns and perspectives shared by CAG members; 2) ensuring a transparent process of sharing detailed study information that will affect the alternatives selection process; and 3) reviewing recommendations and making decisions.

The responsibility of the *CAG members* include: 1) attending CAG meeting and participating in Group facilitated discussions and activities; 2) participating openly and honestly, respecting the opinions of Group members; 3) supporting the specific role of the Group in the study process; 4) representing their organization and community interests; 5) working to achieve consensus among all interested parties and the public/community interests; 6) communicating information back to their respective stakeholder group that they are representing. CAG members are expected to commit to attending scheduled CAG meetings to the extent possible. Progress made at CAG meetings will not be revisited for absent CAG members at subsequent meetings, unless this is required based on new and relevant project information as determined by the PSG.

Formation and Structure – In order to achieve its objectives, it is important that the CAG be representative of the overall study area's interest, those that have a stake in the outcome. Therefore, the CAG membership will include individuals from a broad range of interest organizations. These will include, but will not be limited to, the following:

- Local Government and Planning Agencies
- Advocates of Community Interests
- Chambers of Commerce
- Transportation Organizations
- Pedestrian and Bicycle Interest Groups
- Environmental Coalitions
- School and Church Representatives
- Neighborhood Groups
- Area Residents
- Adjacent Businesses
- Others that have an Interest in the Project

At the initial public informational meeting, the project will be introduced to all stakeholders and membership in the CAG will be sought and formally established shortly after the meeting.

To foster an open and balanced community working group, it is recommended that community advisory groups be comprised of non-elected officials. Briefings will be conducted with local officials and regional elected officials, including legislators, regarding project updates and progress. These meetings may be held at major milestones in the project or as requested.

VII. TENTATIVE GROUND RULES FOR THE STAKEHOLDER INVOLVEMENT PROCESS

For the SIP to be properly implemented and the CAG to function effectively, clear ground rules and operating procedures need to be spelled out and accepted by all parties.

Ground Rules – IDOT has established ground rules as listed below under its CSS policy and procedures. These ground rules will not be considered final until they are agreed upon with the CAG membership.

1. The purpose of the SIP is to gather and duly consider input on the project from all stakeholders, in order to produce the best solutions to any problems identified by the process.
2. Input from all participants in the process is valued and considered.
3. The role of the stakeholders is to advise the PSG, which will make the ultimate decisions on this project. A consensus of stakeholders on project choices is sought, but the ultimate decisions remain in the hands of the PSG, the State of Illinois and the State of Missouri.
4. All participants must come to the process with an open mind and participate openly and honestly.
5. Consensus is defined as a majority of the stakeholders in agreement, with the minority agreeing that their input was duly considered.
6. The PSG will make all final decisions, with the goal of seeking stakeholder consensus thereon.
7. All participants in the process must treat each other with respect and dignity.
8. The list of stakeholders is subject to revision at any time as events warrant.
9. Minutes of all stakeholder meetings will be maintained by the PSG, with the content subject to stakeholders' review.
10. The project must progress at a reasonable pace, based on the original project schedule.
11. All decisions made by the State of Illinois must be arrived at in a clear and transparent manner.
12. Members of the media are welcome in all stakeholder meetings, but must remain in the role of observers, not participants in the process.

Operating Procedures and Techniques – There is a wide variety of procedures and techniques that may be used to help achieve the goals of the CAG. Techniques that may be used include the following:

- Informal group process format
- Focused conversations/Break out group discussions
- Group polling
- Outside assignments
- Field trips (i.e. visits to the project site, and/or other similar completed improvement locations)

The specific techniques to be used will be determined as the CAG process unfolds.

CAG Process – It is expected that the CAG will meet approximately five times over the course of the 36-month study schedule with two additional CAG/Bridge Type Study Focus Group meetings. Meetings will be held at a location near the project and would be approximately two hours in duration. A summary diagram of how the CAG fits into the study process will be presented at the initial meeting.

VIII. STAKEHOLDER INVOLVEMENT SCHEDULE (Tentative)

The project schedule calls for an anticipated completion date of December 24, 2017. Within that period, the study will move through four distinct steps:

1. Context Inventory / Data Collection
2. Analysis of Existing Conditions / Define Problem Issues and Develop Purpose and Need
3. Develop Project Alternatives
4. Determine Preferred Alternative

While the SIP includes a variety of project outreach and coordination as identified, there are six (5) planned Stakeholder/CAG meetings to be held in conjunction with major project development phases in order to insure collaborative and timely stakeholder input. Besides the initial stakeholder public informational meeting at the project kick-off, one (1) additional public informational meeting and one (1) public hearing are planned at key milestones of project development. Summaries of the CAG Meetings and public meetings/hearing will be placed on the Project Website. CAG Meetings are intended to be held in workshop format, while the public informational meetings/hearing will be held in an open house format with the following general objectives and timeframes:

Meeting	Target Date	Topic	Objective
Initial Public / SIP Introductory Meeting	December 9, 2014	Project kick-off; present the CSS approach, gather information about context of area, and IDOT's intent to form an advisory committee.	Identify issues and concerns. Seek advisory committee members.
Local Agency Preliminary CSS Meeting	April 2015	Introduce Project to Local Agency Officials	Explain need for project and how CSS process will be utilized.
CAG Meeting #1	April 2015	Formalize Advisory Comm., Present & discuss the SIP and Ground Rules. Stakeholders will complete Project Context Audits. Present and discuss the project's history, data, known site conditions and constraints, and community concerns and issues. Identify preliminary alternatives for further study and evaluation.	Stakeholder consensus on the SIP; Complete Project Context Audit Develop Project's Problem Statement
CAG Meeting #2	June 2015	Present and discuss preliminary alternatives, impacts, and access concepts for each reasonable alternative.	Seek CAG input on preliminary alternatives and access/ geometry concepts
NEPA/404 Merger Meeting #1	June 2015	Review project's Purpose & Need	Seek concurrence for Purpose & Need
CAG Meeting #3	XXX	Discussion and preliminary evaluation of the Reasonable Alternatives for further study	Seek CAG input on evaluation of Reasonable Alternatives and obtain concurrence
Public Info. Meeting #2	September 2015	Present project Purpose & Need and Reasonable Alternatives to public	Seek public input on Reasonable Alternatives
CAG Meeting #4	XXX	Review Public Meeting input and Reasonable Alternatives	Seek CAG input on detailed evaluation of Reasonable Alternatives
NEPA/404 Merger Meeting #2	February 2016	Review of the Alternatives	Seek concurrence for alternatives to be carried forward.

CAG Meeting #5	XXX	Present and discuss detailed evaluation of the reasonable alternatives, discuss recommendation for Preferred Alternative .	Identify Preferred Alternative
CAG/Bridge Type Study Focus Group Meeting #1	XXX	Present and discuss preliminary concepts for aesthetics for the bridge type for the Preferred Alternative.	Seek input on detailed evaluation of aesthetic concepts
NEPA/404 Merger Meeting #3	February 2017	Review of the Preferred Alternative	Seek concurrence for Preferred Alternative
CAG/Bridge Type Study Focus Group Meeting #2	XXX	Present and discuss detailed evaluations of concepts for aesthetics. Discuss recommendations for the Public Hearing.	Recommend a concept for presentation at the Public Hearing
Public Hearing	July 2017	Present Preferred Alternate (alignment and bridge type) to public	Seek public input on Preferred Alternate

Newsletters are planned to be published and distributed in conjunction with project's milestone stages and public informational meetings and hearing. A mailing list will be compiled for all identified stakeholders and others expressing desire to receive the newsletters. The Project Website and the Public Meetings will provide means for public to request to be added to the mailing list.

The Project Website will be implemented in November 2014. The website will be updated following all public involvement activities and as new information becomes available.

IX. PLAN AVAILABILITY AND MONITORING / UPDATES

Availability of the Stakeholder Involvement Plan

The SIP will be available to stakeholders for review at Public Meetings and on the project website. As the project proceeds forward, IDOT will update the SIP on a regular basis as needed. IDOT will advise stakeholders of future SIP updates and post updates to the project website.

Modification of the Stakeholder Involvement Plan

The plan will be reviewed on a regular basis for continued effectiveness and updated as appropriate. Plan administration includes, but is not limited to, the following:

- Maintaining a current list of project stakeholders.
- Maintaining a detailed public involvement record (log) that includes records of all stakeholder contacts, meetings and comments.
- Ensuring two-way communication and timely responses to stakeholders through formal and informal channels.

Revisions to this SIP may be necessary through all phases of the project. The PSG will provide updated versions of the SIP to agencies involved, as necessary. Cooperating agencies should notify IDOT of staffing and contact information changes in a timely manner. Plan updates will be tracked and identified below:

<u>Plan Updates:</u>	Version 1.0	November, 2014
	Version 1.1	March, 2015

APPENDIX A – PROJECT STAKEHOLDERS

ELECTED / PUBLIC OFFICIALS			
FEDERAL			
The Honorable Richard J. Durbin	United States Senator (Illinois)	711 Hart Senate Office Building Washington, DC 20510	202-224-2152
The Honorable Mark Kirk	United States Senator (Illinois)	524 Hart Senate Office Building Washington, DC 20510	202-224-2854
Vacant – Special Election Pending	United States Representative Illinois 18 th District	100 NE Monroe Room 100 Peoria, IL 61602	309-671-7027
The Honorable Roy Blunt	United States Senator (Missouri)	260 Russell Senate Office Building Washington, DC 20510	202-224-5721
The Honorable Claire McCaskill	United States Senator (Missouri)	506 Hart Senate Office Building Washington, DC 20510	202-224-6154
The Honorable Sam Graves	United States Representative Missouri 6 th District	1415 Longworth HOB Washington, DC 20515	202-225-8221
STATE			
The Honorable Bruce Rauner	Governor (Illinois)	207 State House Springfield, IL 62706	217-782-0244
The Honorable John M. Sullivan	Senator Illinois 47 th District	926 Broadway Suite 6 Quincy, IL 62301	217-222-2295
The Honorable Randy Frese	Representative Illinois 94 th District	3701 E Lake Centre Dr Suite 3 Quincy, IL 62305	217-223-0833
The Honorable Jeremiah W. Nixon	Governor (Missouri)	PO Box 720 Jefferson City, MO 65102	573-751-3222
The Honorable Brian Munzlinger	Senator Missouri 18 th District	201 W Capitol Ave Room 331A Jefferson City, MO 65101	573-751-7985
